

## TECHNOLOGIES

---

**PROFICIENT:** Javascript, Node.js, React, Redux, Express, Sequelize, PostgreSQL, HTML, CSS, Firebase/Firestore

**KNOWLEDGEABLE:** SQL, Ruby, Go, Electron, Expo XDE, React Native, Xcode, ViroReact

## PROJECTS

---

### Monumentall

A location-based AR app built using Viro React and React Native Maps that shows what the world would look like if the contributions of people with diverse gender identities had been more widely recognized throughout history

\*\*Won \$2,000 prize at the [GenEquality Hackathon](#)

### Donke

A Tamagotchi-inspired desktop app that reminds users to step away from the computer at intervals of their choosing. Users can join coworkers in "playpens" to help keep one another accountable for taking breaks. Donke is a React application built on Electron that uses Firestore listeners for real-time updates.

### VoteAlert

A mobile app that allows users to sign up for election alerts via push notification based on their home address. It was built with React Native, Express, Sequelize, and PostgreSQL.
